1. INTRODUCTION

English I is an annual compulsory course, which has a practical as well as theoretical component, with a weekly duration of two hours.

The role of the English language as a Lingua Franca in the world is, nowadays, an irrefutable fact. Therefore, learning English is an essential tool to acquire a set of knowledges, -- in the shape of scientific, technological, literary texts --, not always available in a Portuguese translation.

Besides its function as a tool to describe the world and our actions in it, languages are also "the world" of its speakers. Hence, the presence of English courses in a degree such as *Gestão Turística e Cultural* is imperative, in the sense that it allows the students to acquire information and different points of view from the ones they have access to through the Portuguese language. At the same time, it also expands their horizons regarding other worlds and other dimensions of thought to which, otherwise, they wouldn't have access to.

Although language is a means of knowledge representation, it mustn't be seen as a transparent and neutral vehicle for representation and categorisation. On the contrary, being a cultural construction, it is marked by history and by power structures. Hence, languages have a fundamental role in the transmission and configuration of values, as well as in the social construction of one's identity.

Having all these aspects in mind and wishing to follow *the recommendation N° R(90) 4 of the Committee of Ministers of the Council of Europe*, students will be encouraged to use an inclusive and non-discriminatory kind of language, both on its written and spoken forms.

2. OBJECTIVES

This programme intends to lead the students to consolidate and develop communication and reflexive skills regarding the English language in the specific context of tourism. The students should be able to write and speak English, as fluent and accurate as possible, in the different scenes of the tourism industry. At the same time, it is hoped that the critical approach adopted in class regarding language learning, might lead the students to be aware of the consequences of the discursive choices they make as active speakers.

Hence, in general, it is intended that the students:

- Strengthen grammatical structures within the context of tourism;
- Practice an analytical and deeper reading through texts of intermediate complexity;
